WORLD newsflash

NewsFlash World is an electronic monthly publication of the International Association for Hydro-Environment Engineering and Research. It is published at the beginning of each month and is aimed, free of charge, at anyone interested in hydro-environment engineering and research.

Editor:
David Ferras, IHE Delft Institute for Water Education, the Netherlands

Publications

[HydroLink 1, 2019
Special Issue on Green Infrastructure](#)

This issue is of free access!

Editor:
Dr Angelos Findikakis, Bechtel Fellow, Bechtel National Inc. San Francisco, California Adjunct Professor, Stanford University USA

Guest Editor:
Tomohiro Kuwae, Coastal and Estuarine Environment Research Group Port and Airport Research Institute, Japan

What's New?

 **IAHR is growing:** we are now 58 networks from 49 different countries.

 We are now on Instagram! Please, follow @iahr_water on Instagram now! There will be a YPN section soon. [Click here](#) to visit our profile.

 **Attend** the 8th IAHR International Junior Researcher and Engineer **Workshop** on Hydraulic Structures 2020. [Register Here](#)

What's Next!

 We are creating a new **networking and digital community** for Young Professionals to be connected.

 YPN's will have it's own global **events** this year! YPN's programme at IAHR regional congresses will be announced shortly.

NewsFlash World is an electronic monthly publication of the International Association for Hydro-Environment Engineering and Research. It is published at the beginning of the month and is aimed, free of charge, at anyone interested in water engineering and research. This publication complements the European edition of NewsFlash, published mid-month, and is distributed worldwide to around 27,000 addresses. To submit an item or news, please mail to d.ferras@un-ihe.org

IAHR, founded in 1935, is a worldwide independent organization of engineers and water specialists working in fields related to the hydro-environmental sciences and their practical application. Activities range from river and maritime hydraulics to water resources development and eco-hydraulics, through to ice engineering, hydroinformatics and continuing education and training. IAHR stimulates and promotes both research and its application, and by so doing strives to contribute to sustainable development, the optimization of world water resources management and industrial flow processes.
